

Press release

Unrivalled worldwide! SUHNER presents its fourth drive type.

The diversity of drive types from the grinding tool specialist SUHNER is now unrivalled worldwide. The mains power tools, the pneumatic equipment, and the machines with flexible shaft and separate drive motor have now been joined by the battery grinders.

Mobile grinding in the fourth dimension

Even before this, all professionals working with SUHNER tools could choose from the exhaustive range of drive types. In addition to the classical power tools and the machines with flexible shaft delivering up to 3500 W for an ideal combination of light weight, manoeuvrability, and power, also pneumatic machines are now available in many performance classes.

Now four new compact grinders with mobile battery supply have completed this range. The straight grinder ASC 9, the belt grinder ABC 7, the fillet grinder AKC 3, and the tube polisher ATC 7 can be used for all fast and professional work – without complex installations.

All machines feature the robust SUHNER design for professional operations in the rough conditions on everyday building sites.

They are fitted with powerful, state of the art battery packs delivering 4 Ah and 18 V. Intelligent battery management safeguards a high level of availability over long periods and protects both the worker and the tool.

ABC 7

AKC 3

ATC 7

**An all-round concept with added value:
Tools, abrasives, and advice on
applications included**

Electric, pneumatic, battery, or flexible shaft – supported by these four drive types, the professional can now access the whole world of grinding tool power. Suhner provides the full range of grinding, polishing, and milling products for all machines.

SUHNER demo services visit customer locations to provide individual advice and the end to end solution tailored to each application.
