

UMC 6-R L - a New Dimension in Tight corner and joint graining of Stainless and Aluminium

Stainless Steel Polishing and Grinding

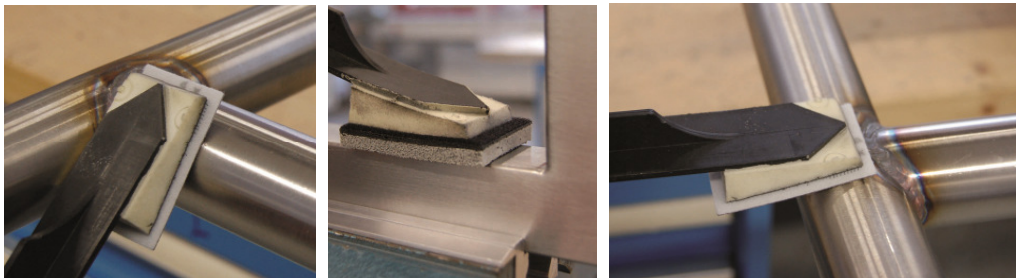

Suhner Abrasive Expert have launched the new UMC 6-R L Electric Power File/Polishing system, designed to revolutionise the finishing of difficult access polishing, graining and brushing applications.

Whether working on Stainless Steel or Aluminium polishing and finishing, UMC 6-R offers low vibration, powerful action for close edge work.

Stainless and Aluminium Polishing to a 'grained' finish of internal corners has always been problematic.

Suhner have designed a tool offering a file type action so that the brush effect can be made in the same direction right up to the weld/ internal joint!

By using hook and loop attachment of abrasive pads and surface conditioning pieces, the UMC 6-R L can quickly solve any finishing application. Suhner's wide range of loop backed abrasives can be rapidly applied.

UMC 6-R L is a 500W light weight Electric Power file with an 8 mm stroke and variable rate of oscillation from 2500 to 5250 strokes per min.- to achieve the finish desired. Its compact dimensions ensure it can fit into tight places.

Typical Applications For Stainless and Aluminium graining and finishing are

- Furniture internal leg joint finishing
- Scallop Joint finishing on Balustrades
- Fillet weld blending
- Internal section de-burring

Demo Service directly on site

Users can benefit from the mobile demo services provided by Suhner. This offers interested parties expert advice free of charge from experienced field workers. The demo services vehicle carries all of the usual tools, attachments, and abrasives that can be used to realise individual end to end solutions for actual workpieces and to optimise the added value.
